

SAFETY MIXER

755 9750

Safety Mixer GIA-15

A thermostatic valve with high mixing capacity. The valve is special designed to temper water to eye/face washes.

The mixed water temperature is adjustable. When the mixer is shipped from factory the temperature is set to + 25 C. The temperature is adjustable through the adjustment screw on the unit.

In case of a breakdown on the cold water side, the valve will automatically close the flow of hot water. On the other hand if a breakdown occurs of hot water the valve will go into cold-water bypass flow and continue to deliver cold water to the safety shower. Unit is constructed of bronze, brass, copper and stainless steel. The valve is delivered including two strainers to prevent from dust that could damage the valve.

Capacity:	30 l/min
Supply:	½" BSP
Body:	Brass
Finishing	Polished Chrome plated brass
Wall bracket:	Available as accessory
