

Tank safety shower 821750

GIA Premix Tank Shower for outdoor use has a volume of 1375 liter with a flow rate up to 76 liter/min. The Tank Shower is suitable where no water lines are available, the water supply is unreliable or if there is a risk of freezing and temperature-controlled water is required.

The water temperature appropriate for emergency use is maintained by a thermostat controlled 3 Kw water heater.

Additives mixed into the water eliminates the risk of bacteria growth and allows you to replace the water only in every 6 months.

The basic design in stainless steel consists of a frame work with a tank on top, insulated on all sides and covered by steel panels.

Technical data

Art no:	821750
Frame and tank:	Stainless steel 1.4301
Insulation:	Polystyrene
Shower head:	Acetal plastic
Flow rate:	Up to 76 lit/min
Tank volume:	1 375 liter
Water supply:	DN25/ G 1" (female), with overfill protection.
Output:	3 kW, with electronic control
Supply voltage:	400Vac, 3ph, 10A
Dimension (L/W/H):	146 x 346 x 160 cm

Accessories

8223563-TANK	Eyewash
821510-TANK	Alarm with sound and flash
821380	Side panels (3 sides)
821751	PVC curtains at entrance
820398	Platform actuator for emergency
